Product Description

The passenger stairs are designed to serve narrow, medium body aircraft with access door sill height between 2200 and 4400 mm. The Airport Passenger Step Vehicle is equipped with a telescopic slope that allows to regulate the height thus ensuring the greatest situations of security and comfort for travelers. The step width is 1290 mm while the platform width is 1990 mm. All walking surfaces are covered in nonskid aluminium and are illuminated by LED lights. The driving and localization carried out from the driver's cabin. The equipment includes the most modern safety and damage prevention systems to protect travelers and the vehicle.

The Airport Passenger Step Vehicle is powered by battery. Optional extras include heater, air-conditioning units, enclosed marquee and safety shoe.
